SAVE TIME WITH CONCRETE ENCASEMENTS

All SVC trade grates are available to purchase pre-encased in concrete, allowing easy and quick installation on site.

Using pre-encased grates eliminates the time spent building formwork and waiting for a concrete pour to set and cure on site.

SVC TRADE GRATES

• the optimal solution for off-road applications •

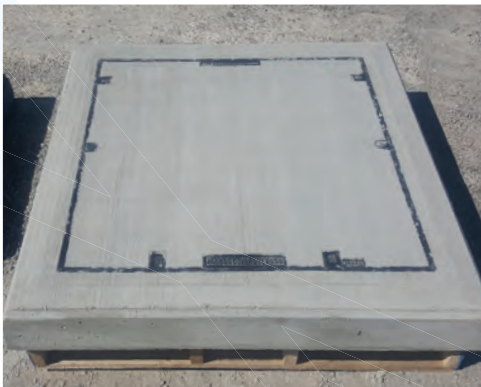

SVC Trade Grates are compatible with the below stormwater and drainage products from SVC's Civil product range:

CONCRETE PITS

SVC stocks an extensive range of precast concrete pits and risers suitable for many different applications.

Custom pits are also available, with knockouts, holes and amendments included as required.

ACCESS COVERS

Access covers are readily available in a range of materials including cast iron, lightweight composite and precast concrete.

All SVC access covers are compliant with the load class ratings specified in AS 3996.

KERB LINTELS

Multiple kerb lintel designs are available to suit Victorian council specifications.

Kerb lintels can be produced in different colours, finishes and custom mixes as required.
